INTERNET ENGINEERING TASK FORCE

SPONSORSHIP
OPPORTUNITIES

Internet Engineering Task Force

Since its inception, the Internet Engineering Task Force (IETF) has been the place where core building blocks of the Internet such as TCP/IP, HTTP, DNS, and email have been developed. Leading technology organizations support the work of the IETF to ensure there is always a neutral venue for advancing the technical foundation for the global Internet today and in the future.

As millions of organizations and billions of people around the world are more reliant than ever on the Internet to work, learn and play, new and emerging standards developed in the IETF are transforming its capabilities.

The Value of IETF Sponsorship

Sponsoring the IETF is an opportunity to support and align with:

Technical excellence

The IETF and the standards it produces are known for their technical excellence. Your sponsorship demonstrates the importance your organization places on this as an attribute of technologies that operate successfully at a global scale.

Values in action

Beyond technology, the IETF community is adapting how it works to help tackle issues such as climate sustainability, diversity and inclusion, and harnessing the power of “running code” to improve the standards they produce. New sponsorship opportunities provide ways to put your organization’s commitment to these values into action.

Industry-defining standards

IETF RFCs define the building blocks of the global Internet, and millions of services and products used around the world every day. Your sponsorship supports the continued production of IETF standards as Internet technologies grow and evolve.

Open collaboration in a neutral forum

Any interested person can participate in the work of the IETF, know what is being decided, and make their voice heard. Open participation and open processes—and the freely available technical specifications they produce—have built a global community focused on technical excellence.

“The IETF is where the technical standards for ensuring the stability and continuity of the Internet are created. As a Global Host since 2014, sponsoring is an easy and effective way to support the valuable work of the IETF around the world, and to help ensure the future of the global, open Internet.”

Glenn Deen,
NBCUniversal,
IETF Global Host

IETF Impact

200+ Technical specifications published each year as RFC documents

TLS 1.3

Improved Web security

Published in 2021, TLS 1.3 is today used by more than three-quarters of the top 1000 websites in just two years of existence.

WebRTC

Seamless videoconferencing

WebRTC has been adopted by videoconferencing platforms to enable high-fidelity real-time voice and video at Web scale.

QUIC

New transport technology that improves performance and privacy

QUIC was reviewed, redesigned and improved with broad input from across the industry. Already being adopted globally, QUIC is a newly released transport protocol for the modern Internet that is handling more than 75% of traffic on major websites.

Made possible by a community of 7000 individuals from around the world.

Sponsorship Opportunities

The IETF sponsorship program provides opportunities to ensure the IETF community's contributions to the global Internet's growth and evolution continue.

The IETF holds three meetings a year with 100+ working groups and 1000+ participants meeting to advance their work. These meetings are only possible because of the generous support of our sponsors. Meetings, whether online or in-person, provide the space and time for collaboration that allows the IETF community to work smarter and faster.

GLOBAL HOSTS

SPONSORSHIP:

US\$130,000
per year with
a 6 or 9 year
engagement

ENDURING SUPPORT FRONT AND CENTER AT MEETINGS

Global Hosts reflect the highest level of commitment and recognition among all IETF sponsors. These sustaining partnerships ensure the continuity of IETF meetings over terms of six or nine years. Global Hosts receive distinctive benefits for their sustaining contributions, and—through their ongoing commitment—are uniquely able to provide advanced input into meeting venue selection. The IETF manages the details of hosting meetings for Global Hosts, making the process seamless and easy.

GLOBAL SUPPORTERS

SPONSORSHIP:

US\$100,000
per year with a
3, 6, or 9 year
engagement

ENDURING SUPPORT ALL YEAR LONG

Global Supporters strengthen all aspects of the IETF and are invaluable contributors to ensuring its stability. There's a lot more to the IETF than meetings. Global Supporters keep the organization running and provide support that allows the IETF to continuously improve the participant experience. Global Supporters receive distinctive benefits and are recognized continually for their support.

Meeting hosts receive a premier level of visibility at IETF meetings, as well as a set of exclusive add-ons only available to the hosting organization. The Meeting Host opportunity is subject to availability as Global Hosts have the first option of hosting a meeting.

for details

“One of the great things about attending the IETF was the many opportunities to talk to people and make connections. For example, on Sunday night there was the Welcome Reception and on Monday morning, there was a Systems Networking Event where I had the opportunity to meet a lot of female participants. In the evening, there was the New Participants’ Dinner where I was able to connect with other newcomers to the IETF. I especially got close to other new participants who were close to my age and we spent the rest of the week attending meetings and events together.

Advancing Core Values

Ensuring broad participation, specifications informed by “running code,” and a global Internet that supports a sustainable future for the world are core values of the IETF community. Your sponsorship demonstrates that your organization shares these values, and supports programs that advance them on an ongoing basis. Each value can be sponsored at Gold, Silver, and Bronze levels of commitment with varying benefits.

Diversity and Inclusion

Your contribution provides a path to sustained engagement for those who would otherwise face difficulties participating. Your support sustains fee waivers to lower economic barriers to meeting participation, the IETF Systems program which offers women participants the opportunity to connect, share, and learn with each other, as well as new and ongoing initiatives like childcare for attendees throughout the meeting week.

More information at:

<https://www.ietf.org/diversity>

Sustainability

As a forward-looking community focused on the Internet's continued growth and evolution, the IETF recognizes the importance of sustainability in both Internet technologies and our global environment. Partner with us as we take steps towards carbon neutral operations and eco-friendly meetings. Typical conferences take a huge toll on the environment with travel, single use plastics, and food waste. The IETF is reducing its carbon footprint and becoming more sustainable by:

Using eco-friendly

- Banners
- Signage
- Lanyards
- Badges and badge holders

More information at:

<https://www.ietf.org/sustainability>

Running Code

"We believe in rough consensus and running code" is an unofficial mantra of the IETF and underscores the value the community puts on work that makes a difference in the real world. The IETF relies heavily on dedicated volunteers to develop tools, design and deploy one of the most advanced networks during meetings, and run one of our most popular programs, the IETF Hackathon. Your sponsorship will be front and center for some of the IETF's most attended events while supporting essential technology to support the work of the IETF.

Open Internet

The Open Internet sponsorship supports a long-term future for IETF work, meetings, and vision. This sponsorship will help preserve our ability to meet globally, provide open entry to persons and organizations of all size and industry, and allow the IETF work to continue unhindered by global political and policy tensions. It will also allow the IETF to maintain the RFC series of open technical documents in near-perpetuity. By anticipating future needs today, Open Internet sponsors ensure a high-functioning, diverse, and robust IETF community of tomorrow.
