

Email Address Policy for Staff

The IESG and LLC Board have formalized the following policy regarding the allocation of email addresses for staff members in the ietf.org domain:

- * new email addresses for general and administrative roles under ietf.org must be chosen to avoid conflicts with potential IETF mailing list names;
- * the IESG must be consulted before any new email addresses under ietf.org are created and will have the sole responsibility for approving and managing addresses under ietf.org;
- * new individual email addresses for LLC personnel will be allocated under a new staff.ietf.org subdomain, with the LLC being solely responsible for the approval and management of those addresses;
- * existing individual email addresses under ietf.org at the time the policy goes into effect will continue to receive email, which will be forwarded to new staff.ietf.org subdomain addresses; and outbound mail should be preferably be sent from staff.ietf.org addresses or role-based ietf.org addresses.
