

Internet Assigned Numbers Authority (IANA) Plenary Report

IETF 117, San Francisco

Key Highlights and Milestones

- IANA met or exceeded all service level agreements from March to June 2023.
- More than 1057 IETF-related requests were processed since IETF 116. These include document reviews, registry creation, new registrations, modifications to existing registrations, and deletions.
- Created 25 new registries and four registry groups (reflected as new unique registry URLs) since IETF 116.

Overview of Activities

Performance in brief

Last 12 months (i.e. June 2022 – May 2023)

*Does not include Private Enterprise Number (PEN) Requests

More comprehensive monthly statistics reports can be found at <https://iana.org/performance>

Since IETF 116

Request Type	Total
Last Calls	52
IESG Evaluations	68
RFC Publication Approvals	63
Media Types	28
Ports and Port Modifications	24
New Private Enterprise Numbers	585

Customer satisfaction in brief

At the conclusion of request processing, IANA sends a short survey to customers to ask them whether they were satisfied with our performance. These are only issued for requests directly sent to IANA (i.e. not through the RFC editorial process), and no more than one survey is sent per customer every 60 days even if they conduct multiple transactions.

	March	April	May	June
Response Rate	58.3 %	36.4%	44.4%	33.3%
Satisfaction	100%	100%	75%	100%

Updates and initiatives

- A significant platform upgrade for Private Enterprise Number (PEN) request submission, processing, and registry publication was launched in November 2022. The platform will be expanded in future phases to support registration workflows for other IETF registries.
- A project to review “designated experts” for registries has been underway, to ensure the experts are accurate both in terms of their appointments, and their contact details. Work to date has focused on individually appointed experts, with a comprehensive inventory taken. We are now working with the IETF area directors to review adjustments that need to be made. Outreach of registries managed by teams of experts is now in progress.

Additional information

- IANA will maintain “office hours” during IETF 117. Look out for our booth, and bring any questions you may have about your Internet Drafts, how registries operate, or anything else IANA-related.
 - Our booth will be manned Monday through Thursday, from 9am to 5pm
 - If we’ve stepped away, or you’re attending remotely, you can always drop us a note to iana@iana.org and we will follow up with you

- We always encourage authors to speak with us about their prospective IANA registrations early in the document development process. Send questions and requests for early document reviews to iana@iana.org
- Our index of protocol parameter registries can be found at <http://www.iana.org/protocols>
