---

nflverse_packages	<i>List all packages in the nflverse</i>
-------------------	--

---

**Description**

List all packages in the nflverse

**Usage**

```
nflverse_packages(include_self = FALSE)
```

**Arguments**

`include_self` Include nflverse in the list?

**Value**

A vector of type "character".

**Examples**

```
nflverse_packages()
```

---

nflverse_sitrep	<i>Get a Situation Report on System, nflverse Package Versions and Dependencies</i>
-----------------	---

---

**Description**

This function gives a quick overview of the versions of R and the operating system as well as the versions of nflverse packages, options, and their dependencies. It's primarily designed to help you get a quick idea of what's going on when you're helping someone else debug a problem.

**Details**

See [nflreadr::nflverse\\_sitrep](#) for details.

---

nflverse_update	<i>Update nflverse Packages</i>
-----------------	---------------------------------

---

**Description**

Check all nflverse packages for available cran updates.

**Usage**

```
nflverse_update(recursive = FALSE, repos = getOption("repos"), devel = FALSE)
```

**Arguments**

recursive	If TRUE, will also list all strong dependencies of nflverse packages.
repos	the repositories to use to check for updates. Defaults to <code>getOption("repos")</code> .
devel	If TRUE the function will look for prebuilt development versions on <a href="https://nflverse.r-universe.dev/">https://nflverse.r-universe.dev/</a> so it is possible to install development versions without GitHub.

**Value**

Returns NULL invisibly. Called for side effects.

**Examples**

```
try(
  nflverse_update()
)
try(
  nflverse_update(devel = TRUE)
)
```
