

Package ‘r.proxy’

May 20, 2026

Type Package

Title Set Proxy in R Console

Version 0.1.4

Maintainer Yonghe Xia <xiayh17@gmail.com>

Description The use of proxies is required in certain network environments. Despite the power of system level software, it is still inconvenient to switch proxy networks at random in R's console. This package is designed to provide one-click switching between proxy and non-proxy states.
